

Yan Cesare 5.1

WEBSITE DEVELOPMENT RESEARCH AND PLANNING

This website is a **creative portfolio** that showcases my personal work, projects, and creative journey. It serves as a digital space where I can present my skills, style, and experience in a visually appealing and professional manner. The goal is to attract potential clients, collaborators, or employers, and to provide a clear sense of who I am as a creative professional.

The site includes:

- A homepage with an introduction and featured work
- A portfolio/gallery section
- A page about me and my creative process
- A contact page with a form and social media links
- Optional: A blog or updates section for thoughts, inspirations, or news

Persona 1: Creative Director – Alex Caruana

- **Age:** 34
- **Occupation:** Creative Director at a design agency
- **Location:** Valletta, Malta
- **Goals:** Looking for fresh talent to bring into upcoming projects or freelance work.
- **Pain Points:** Doesn't have time to dig through messy or slow websites. Needs quick access to visual work and a clear view of the creator's strengths.
- **Technology use:** Uses both desktop and iPad for reviewing portfolios.

Persona 2: Recruiter – Sarah Borg

- **Age:** 28
- **Occupation:** HR Specialist at a media company
- **Location:** Sliema, Malta
- **Goals:** Assess whether a candidate's portfolio matches the company's branding and project needs.
- **Pain Points:** Gets overwhelmed by flashy websites with poor usability or lacking navigation.
- **Technology use:** Uses a laptop during work hours and a phone for browsing after hours.

Persona 3: Aspiring Creative – Jamie Xu

- **Age:** 19
- **Occupation:** University student studying design
- **Location:** International
- **Goals:** Looking for inspiration, mentorship, or someone to collaborate with on personal projects.
- **Pain Points:** Gets discouraged by sites that feel too exclusive or hard to explore.
- **Technology use:** Mostly uses mobile devices; loves minimal but expressive design.

Key Elements of Web Accessibility:

Keyboard Navigation

- All functions should be accessible using a keyboard (e.g., tabbing through links and buttons).
- Helps users with motor disabilities or those who can't use a mouse.

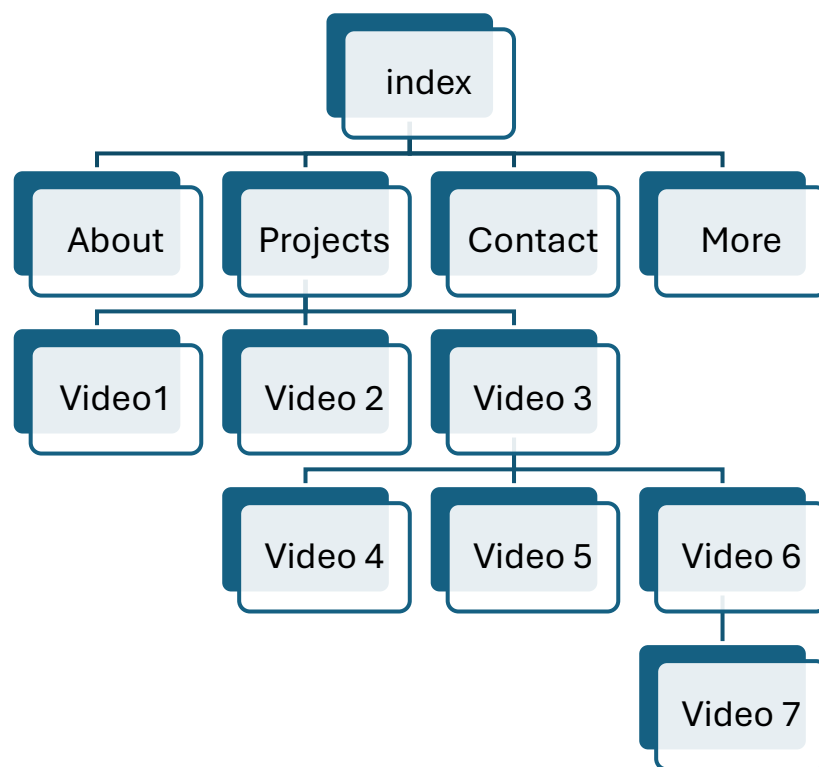

Clear Typography

- Use legible fonts, proper line spacing, and consistent hierarchy.
- Makes content easier to read, especially for users with dyslexia or cognitive challenges.

Captions & Transcripts

- Video or audio content should include captions and/or transcripts.
- Crucial for deaf or hard-of-hearing users.

SITEMAPS AND WIREFRAMES

In the Home page there will be the demo reel and in the projects page there will be most of my projects that are clickable through the drop down menu from the navbar.

Test Chart

Test Case ID	Page	Test Description	Input	Expected Output	Status
TC1	Homepage	Load the homepage and check multimedia content	Open index.html	Display of homepage content (text, images, video)	Pass
TC2	About	Check navigation to "About" section	Click "About" from navbar	Redirect to About page and show personal info	Pass
TC3	Projects	Test project thumbnails functionality	Click on project thumbnail	Redirect to project page and display project info	Pass
TC4	Contact	Form submission with valid details	Fill out form and click submit	Display confirmation message after submission	Pass
TC5	Contact	Form validation for required fields	Leave a required field empty	Error message for empty required field	Pass
TC6	More	Test navigation from "More" link	Click "More" from navbar	Display more content section	Pass

IPO Chart – Homepage (index.html)

Input	Process	Output
User clicks navigation links (Home, About, Projects, Contact, More)	JavaScript and HTML handle routing to different sections or pages	User is redirected to the selected page
HTML structure and CSS files (Main.css, navbar.css, etc.)	Browser renders layout and design using HTML & CSS	Visual structure of homepage: navbar, intro, images, video, parallax sections, footer
Video files and image assets (Bird.mp4, people.avif, etc.)	HTML <video> and tags load and display media	Dynamic media experience with autoplay videos and images
JavaScript files (navbar.js, main.js)	Handle interactions like hover effects or animations	Enhanced user interactivity
Click on “Discover” button	<a> tag navigates user to About page	About page loads in browser
Scroll through page	CSS parallax and JavaScript manage visual scrolling effects	Visual animations and transitions as user scrolls
View demo reel section	User views embedded video player with controls	Playback of Demo Reel video
Footer contact details	Static HTML content with email, phone number, and address	User sees contact information

About Page

Input	Process	Output
HTML structure for About page	Load structured content	Displayed About section with bio, image, and page heading
CSS styling	Apply visual styles	Proper spacing, font styling, responsive layout
Personal photo or avatar	Display image	Photo appears next to bio
Text (name, short biography, hobbies, interests, focus in creative media)	Render content	Users can learn more about your personality and background
Navbar and footer included	Allow page navigation and footer info	Consistent layout across all pages

Projects Page

Input	Process	Output
HTML content with project thumbnails/cards	Render grid layout or carousel	Showcases multiple projects visually
Images/video snippets per project	Load and display media content	Users see project previews or demos
Text	Display content with styling	Visitors understand what the project is about and your contribution
CSS for layout and hover effects	Create responsive and animated layout	Stylish, clickable cards or slides
Carousel	Implement interaction	Users can interact to explore all projects easily

Contact Page

Input	Process	Output
HTML form (name, email, message)	Render input fields	Visitors see a form to fill in details
CSS for form design and layout	Style form elements	Professional and accessible contact form
JavaScript	Handle interactions and validation	User gets confirmation or error messages
Contact text	Render static contact details	Extra options for getting in touch

THE VALIDATION PROCESS

For the validation I used these links that my classmate had sent.

HTML: https://validator.w3.org/#validate_by_upload

CSS: <https://jigsaw.w3.org/css-validator/validator>

With these sites I was able to identify all the errors that my html and CSS. I began by inputting all of the code manually into the box and started by fixing all the errors until it gave me no errors found anymore.

My CSS fortunately had no errors.

```

71.     </main>
72.
73. </main>
74.
75. <footer>
76.   <div class="footer-title">
77.     Yan Cesare Creative Portfolio
78.   </div>
79.
80.   <div class="footer-outline">
81.     <div class="footer-info">
82.       <h2>Contact Me</h2>
83.       <p>Email: cesarey2004@gmail.com</p>
84.       <p>Phone: +356 7929 4381</p>
85.       <p>Address: 38, Vince Dimech Street, Zurrieq</p>
86.     </div>
87.     
88.   </div>
89. </footer>
90.
91. </body>
92. </html>
93.
94. </head>

```

Used the HTML parser.

- Error** Start tag `head` seen but an element of the same type was already open.

From line 12, column 1: to line 12, column 6

```
<ut.css"><head><body>
```

- Error** The element `footer` must not appear as a descendant of the `footer` element.

From line 76, column 9: to line 76, column 16

```
><footer>
```

- Error** End tag for `body` seen, but there were unclosed elements.

From line 93, column 1: to line 93, column 7

```
</footer><body></hea
```

- Error** Unclosed element `footer`.

From line 75, column 5: to line 75, column 12

```
ain><footer>
```

- Error** Saw an end tag after `body` had been closed.

From line 94, column 1: to line 94, column 7

```
></body></head>
```

- Error** Stray end tag `head`.

From line 94, column 1: to line 94, column 7

```
></body></head>
```

- Error** End of file seen and there were open elements.

From line 94, column 1: to line 94, column 7

```
></body></head>
```

- Error** Start tag `head` seen but an element of the same type was already open.

From line 12, column 0: to line 12, column 6

```
ut.css"><head><body>
```

- Error** Saw an end tag after `body` had been closed.

From line 92, column 1: to line 92, column 7

```
></body></head>
```

- Error** Stray end tag `head`.

From line 92, column 1: to line 92, column 7

```
></body></head>
```
